Education

The Hongkong University of Science and Technology

Master of Philosophy in Computer Science

Sep 2025 – Jun 2027

Guangzhou, China

Research Interest: VR/AR, Human-Computer Interaction, Computer graphics

University of Chongqing

Bachelor of Economics and Business in Finance (GPA: 3.72/4)

Sep 2021 – Jun 2025

Chongqing, China

Research Experience

HCI Lab, Institute of Software, Chinese Academy of Science

June 2024 – Sep 2024

Research Intern advised by Prof. Teng Han

Beijing, China

- **Immersive telesurgery system in VR.** Designed and developed an immersive telesurgery system and explored the remapping impact of spatial head-hand relations in VR/AR teleoperation.
- **Optimized measurement method for VR locomotion.** Identified and expanded three continuous measurement methods to evaluate transient physiological discomfort during VR/AR locomotion.

VCCM VPI, Texas A&M University

May 2024 – Present

Research Intern advised by Prof. Wai Tong

College Station, Texas/Remote

- **Generating Opportunistic Tangible UIs in AR.** Developed an AR system to generate opportunistic TUIs utilizing daily objects' embodied interactions across contexts. Leveraged GroundingDINO and SAM2 to deal with the resolution and perspective mismatches in Quest3 enabling interaction recognition in the system.

Chongqing University

Jan 2024 – May 2024

Collaborated with Jin-du Wang from HKUST and Dr. Xiang Li from Cambridge University

Remote

- **Immersive Windows Management system in VR/AR.** Developed a window management system on user's palm to integrate the basic functionalities of existing computing device into VR/AR.

Publication

Published (Conferences and Journal)

Handows: An Interactive Window Management System for Mixed Reality

Jin-Du Wang, Ke Zhou, Haoyu Ren, Per Ola Kristensson, Xiang Li

Accepted by ISMAR'25 (TVCG Track) **Honorable Mention**

Exploring the Remapping Impact of Spatial Head-hand Relations in Immersive Telesurgery

Tianren Luo, Ke Zhou, Pengxiang Wang, Shuting Chang, Gaozhang Chen, Hechuan Zhang, Qi Wang, Teng Han, Feng Tian

Accepted by ACM CHI'25

Under Review

GOATUI: Generating Opportunistic Adaptive Tangible User Interfaces through Function Alignment in Augmented Reality

Ke Zhou, Jin-Du Wang, Tianren Luo, Linping Yuan, Wai Tong

Under Review for CHI'26

Continuous Measurement Methods for Transient Physiological Discomfort in VR Locomotion

Tianren Luo, Pengxiang Wang, Shuting Chang, Ke Zhou, Nianlong Li, Yulong Bian, Xiaohui Tan, Qi Wang, Teng Han, Feng Tian

Under Review for CHI'26

Technical Skills

Programming Languages: Python, Java, C#, Javascript, Matlab, HTML/CSS, $\text{\LaTeX}$

Applied statistics and data analysis: R, Stata, python

Quantitative research methods

Game Engines: Unity, Blender
